

SIT217 - Robotics Project

Task 2.1P Robotics project idea

Hardware Required

None

Software Required

Microsoft Word

Pre-requisites: You must do the following before this task

None

Task Objective

Objective of this task is to share project ideas with your classmates and to help you find team-mates to form a team with.

Steps:

1. You need to come up with three project ideas. Your ideas could be addressing a real-world problem, something you always wanted, or in a domain you are passionate about.
2. Write down your ideas and share them with the class on Cloud Deakin. A Cloud Deakin discussion forum has been purposefully created for ideas.
3. Take a screenshot of your post on discussion forum.
4. Review your classmates' posts and leave comment on at least **two** other posts. Your comments could be around the project ideas they have shared, perhaps a question you may have, or Idea you want to share, or even request to form a team together.
5. Take screenshot of your comments on other posts.
6. Put your idea screenshot, and the comment screenshots on a word document, convert it to PDF and submit to OnTrack.

Task Submission Details

A PDF containing your screenshots (one screenshot of your three ideas, and at least two screenshots from comments you have put on your classmates ideas).

SIT217 - Robotics Project

Remember, anytime you submit a task to OnTrack, it is a good practice to check the status of any existing tasks, and the future tasks you are expected to complete. If you have got feedback on previous tasks, you may need to fix and resubmit some of your work. You want to check out why, so that you can learn from this and make it faster and easier to accomplish later work to the required standard.
